

ESA Clinical & Research Fellowship Database

Last updated: 20th June 2023

The ESA Clinical & Research Fellowship Database is an initiative of the ESA Early Career Committee. We aim to provide a list of clinical and research positions that are recruited outside state matching programs.

If you would like to contribute to the ESA Clinical & Research Fellowship Database, you can complete the required information here (<https://forms.gle/s5PJRr9DgJ7JGJ9Z9>) or email Dr Lauren Tyack (Lauren.Tyack@health.wa.gov.au) or Dr Shejil Kumar (shejil.kumar@health.nsw.gov.au).

Contact person & application process	A/Prof Ann McCormack via email: a.mccormack@garvan.org.au

Name of position	PhD Candidate - obesity
Location	NBMLHD, Nepean Hospital
Duration	3-6 years
Full time equivalent	Negotiable
Remuneration	Nil
RACP Accreditation status	Not accredited
Pre-requisites	Intention to complete PhD in obesity
Position description	Detailed phenotyping and evaluation of a lifespan tertiary obesity service
Contact person & application process	Dr Kathryn Williams, HOD Endocrinology, Nepean Hospital 02 4734 4754

Name of position	PhD Candidate
Location	Garvan Institute of Medical Research, NSW
Duration	3 years
Full time equivalent	1.0 FTE
Remuneration	NHMRC postgraduate scholarship rate with clinical loading (funded through an NHMRC Centre of Research Excellence Award)
RACP Accreditation status	Non-core year
Pre-requisites	3rd year advanced training undertaking PhD
Position description	PhD candidate
Contact person & application process	Prof. Katherine Samaras. Email CV and letter of expression to k.samaras@garvan.org.au

Name of position	Andrology Fellow
Location	Concord Repatriation General Hospital/ University of Sydney
Duration	Depends on role
Full time equivalent	Negotiable
Remuneration	Applicant would be supported to apply for a higher degree or PhD scholarship/stipend
RACP Accreditation status	Not accredited
Pre-requisites	This role would suit an AT in their 3rd year of training in Endocrinology. However, a BPT who has completed their exams and has an interest in Endocrinology training would also suit this position.
Position description	This position provides an opportunity to develop clinical excellence in all aspects of clinical male fertility and men's health by part time clinical work and an opportunity to pursue higher degree by research. A variety of research projects are available in male fertility, androgen abuse, sperm cryostorage, steroid hormone LC-MS and transgender medicine. The trainee will also have an opportunity to attend andrology clinics and be a part of the regular multidisciplinary team meetings
Contact person & application process	Please email expression of interest with your CV to Prof David Handelsman on djh@anzac.edu.au

Name of position	Thyroid Cancer Research Fellow
Location	Royal North Shore Hospital
Duration	1 year
Full time equivalent	0.5 FTE
Remuneration	\$50,000
RACP Accreditation status	Non-core year
Pre-requisites	3rd year Endocrinology advanced trainee preferred
Position description	Thyroid cancer research fellow, 2.5 days of clinical research per week
Contact person & application process	Dr Matti Gild at matti.gild@sydney.edu.au

Name of position	Endocrinology AT Macquarie University Hospital
Location	Macquarie University Hospital NSW
Duration	12 months
Full time equivalent	1.0
Remuneration	as per JMO unit contact depending on career stage Ms C McPhee
RACP Accreditation status	Core year
Pre-requisites	Advanced trainee level
Position description	<p>The position offers mainly outpatient-based medicine in a private practice setting, an experience that may be difficult to gain in a public hospital setting. The AT sees patients off the consultants' lists but could follow the patients for the year and experiences chronic disease management. The AT consults with patients independently and provides an initial management plan, according to their level of confidence and expertise. The consultants then join every consultation and further discuss and refine the treatment decisions. The trainee has found this a valuable learning experience, allowing a mix of autonomous decision-making, and supervision. The breadth of experience would be beneficial for an AT at any stage. MUH does not have an emergency department, therefore exposure to acute endocrine emergencies is limited. Inpatient acute endocrine emergencies such as severe hypercalcaemia, pituitary apoplexy are managed in the intensive care unit with the support of the specialty teams. The trainee provides inpatient consultations to the hospitals' medical and surgical units, being the first on-call during hours. No after-hours on-call duty. The AT collaborates closely with the diabetes nurse educator, Ms Niki Witney who is has a specialised Type 1 focus in insulin pump and technology.</p> <p>The trainee is responsible for organizing the monthly pituitary and general endocrinology multidisciplinary meeting and performs basic dynamic endocrine tests. The unit has a strong focus in research and development; the AT has an afternoon per week dedicated to research and participation in clinical trials, a highly valuable experience and exposure to research. There is an office space for the trainee with access to core Diabetes and Endocrine texts and journals online, and a well-equipped library on university campus. The trainee reported being highly satisfied with the quality of training and level of supervision and support within the unit. The workload for the trainee is appropriately balanced for training with assigned time for research, reading and meeting attendance. Educational activities Educational activities include a fortnightly journal club and regular clinical case discussions about complex patients and referrals. There is a monthly pituitary multidisciplinary meeting and a general endocrinology - thyroid/ adrenal/parathyroid/neuroendocrine MDT. Additionally, there is dedicated time allocated for research trials involvement on Thursdays afternoon. The AT is appointed as a conjoint lecturer at the Macquarie University Medical School, actively participates in bedside teaching of medical students and academic activities of the MD program. The AT is encouraged and given opportunities to attend the</p>

	monthly Sydney inter-hospital Endocrinology clinical meeting, Hormone school, national society meetings and related workshops.
Contact person & application process	A/Professor Veronica Preda central panel

NT

Name of position	PhD Candidate - Diabetes in Pregnancy
Location	Menzies School of Health Research, NT
Duration	3-6 years
Full time equivalent	Negotiable
Remuneration	Applicant would be supported to apply for a PhD scholarship/stipend, with opportunities for part-time clinical work at Royal Darwin Hospital.
RACP Accreditation status	Non-core year
Pre-requisites	Third year advanced trainee or recent fellow
Position description	<p>Do you have an interest in improving the health of Aboriginal and Torres Strait Islander women and families? Are you passionate about ensuring health services are culturally safe and appropriate?</p> <p>The Diabetes Across the Lifecourse: Northern Australia Partnership, is seeking talented candidates to apply for a PhD within our Diabetes in Pregnancy team. The Partnership has a proven track record in collaborative work with Aboriginal and Torres Strait Islander people, health services and policymakers on research in diabetes in pregnancy and youth diabetes. The Partnership was founded in 2011 in the NT and has since expanded to include Far North Queensland (FNQ) and the Kimberley.</p> <p>There are currently PhD opportunities within a study aiming to reduce diabetes-related risks for Aboriginal and Torres Strait Islander women before, during and after pregnancy in the NT and FNQ. This study, funded by the Medical Research Futures Fund (2020-2025), involves multiple methodologies, including participatory action research, experience-based co-design and quality improvement initiatives derived from analysis of clinical registers and other large data sets. A variety of PhD opportunities are on offer depending on the interests and expertise of the applicant/s.</p> <p>The successful candidate would live in Northern Australia (NT or FNQ) for the duration of the project and undertake relevant cultural awareness and methodological training as required.</p> <p>Our PhD candidates frequently have success in securing NHMRC Postgraduate Scholarships to support their candidacy. Additional benefits for the successful candidate would include joining the Partnership's large and supportive cohort of HDR students and Early Career Researchers, which fosters a culture of conducting high-quality research with real-world impacts with expertise across a diversity of methodologies</p>
